

An Innovative
Partner in
Chemistry

The Innovator

From the President...

We are blessed that business continues to grow at CJB Industries. The size of our facility increased. Equipment and production capacities were upgraded. We are grateful to existing customers who are the root of our success. All of us at CJB thank you for your ongoing support and look forward to growing all of our businesses in the future. Our customers, vendors, and a host of business supporters are our partners and we value the relationships developed. We also welcome CJB's new partners. Your business is sincerely appreciated and we will work hard to earn it.

Our new 12,500 sq ft liquids processing plant is in operation. A new 45 liter wet mill compliments our existing 60 liter mill. Batch/blend tanks were installed on weigh cells for more accurate processing. On the packaging side, CJB's filling capabilities expanded with the addition of a liquid packaging line focusing on 2.5 gallon containers. Ink jet printers for lot coding, a semi-automatic case erector, and labeling equipment work together expanding our packaging capacities and shortening the turn-around time for our customers. We look forward to improving our operations and organization.

Going forward, we see a good 2008 and beyond. Thank you all for your assistance and continued support. Let us know how we can better serve you.

Best Regards,

A handwritten signature in red ink, appearing to read "R. Clinton Beeland, Jr.", written over a white background.

Industries
is committed
to meet and
exceed customer
expectations through
dedication and
continual
improvement”*

Frances Burkhalter

Office Manager

Frances will be with us 4 years in September, but was no stranger to CJB management, having worked with Jeana Beeland earlier at the Levi's plant here in Valdosta. Frances mentioned Jeana encouraged her to complete her school work in Computer Science and Accounting and Frances has a spoken real affinity for working at CJB. She is responsible for office administrative operations including most human resource related activities, payroll and accounting functions. She is our office "go to" person. Frances and retired husband Gordon are life-long South Georgia residents. They raised two children here, Burt and Ruth, who both reside locally with their families. Frances and Gordon thoroughly enjoy having their four grandchildren, Sawyer, Linzie, Tucker and Allivia visit and stay over. Her favorite activities outside of work include, Church, family and grandchildren, and working in the yard.

Outsource Your Manufacturing in Today's Changing Economy

Whether there is a slowdown or an upswing in your business, it may be time to explore manufacturing options, buyout services, internalizing production, or expanding your offerings.

Take cost out of the process. New manufacturing start-ups, as well as phase-outs, can be costly. We can help with your needs for quick turn-around time and last minute requirements. This may be the time to evaluate outsourced manufacturing as a cost effective alternative.

Improve your logistics. The cost of all fuels are projected to continue to rise. Considering this and the limited availability of drivers, production location plays an even more significant role. CJB offers an ideal southeast location to ship domestic or export. Our facility is less than 5 miles from Interstate-75 and 30 miles from Interstate-10. We also ship and receive from ports in Jacksonville, Savannah, Charleston, Tampa, and Miami.

Take advantage of the lower dollar. If you are importing finished goods, now is a very good time to consider manufacturing in the States. The devalued dollar offers a more cost effective production conversion than ever.

Re-work or assemble kits for your product. CJB is a cost effective alternative for re-working materials or for labor intense, hands-on tasks of multi-piece assemblies. As our customers decide to update packaging, we can assist in the transition from one style to another.

New Liquids Processing Plant

What's New?

In addition to and in conjunction with our liquids processing plant expansion, we've also added...

- A liquid products filling line which fills by weight. It is set-up with conveyors, on line labeling, ink-jet printers for bottle and carton coding and a case erector. We can better handle your 2.5/gallon filling!
- An additional in line induction sealer
- A 30 hp rotary screw air compressor
- A 45 liter wet mill, in addition to our in-place 60 liter mill
- A 30 ton water chiller
- Liquid blend and batch tanks on weigh cells

And, please know we also....

- Mill, blend, and package liquids and solids and fill from small package size up to bulk
- Blend, fill and package high viscosity products, >500m cps
- Are ISO 9001/14001 & TS 19649 certified and FIFRA registered
- Repackage/re-work solids & liquids and hand assemble
- Are quick, reliable and accurate in response to your inquiries and requirements

Fallon Cole

Receptionist

Meeet Fallon, our friendly, smiling and upbeat receptionist.

She and her US Air force husband Brett relocated after his graduation from Tech school in Michigan (also their home ground) this past summer to his first duty station, our local Moody AFB. Fallon joined us shortly afterwards in September. She states the helpful and very friendly folks in Valdosta are what stand out most when comparing living here to back home. Beyond answering our in-coming calls and greeting our visitors, Fallon is responsible for various office and operations related duties. She and Brett are the proud owners of two dogs, a rat terrier Duke, and Max, a husky pup. All four enjoy year round outdoor activities including hiking, backpacking, and camping. They haven't been to the Florida beaches yet, but plan to take the 2 hour drive very soon.
